THE REAL SUSTAINABLE VERTICAL GARDEN SYSTEM

ITEM: VERTICAL GARDEN PLANTER BOX WITH GROWING MEDIA

Installation
Manual

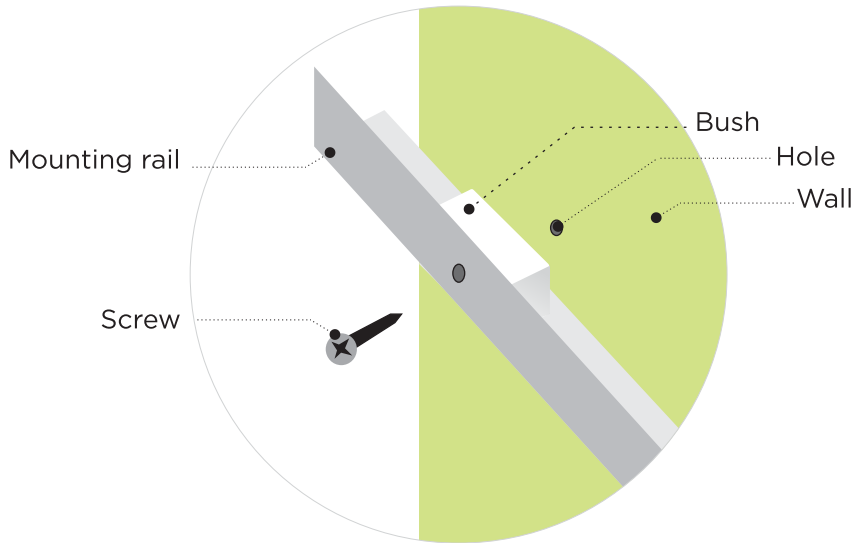

TECHNO[™]
PLANTERS

Mounting the structure

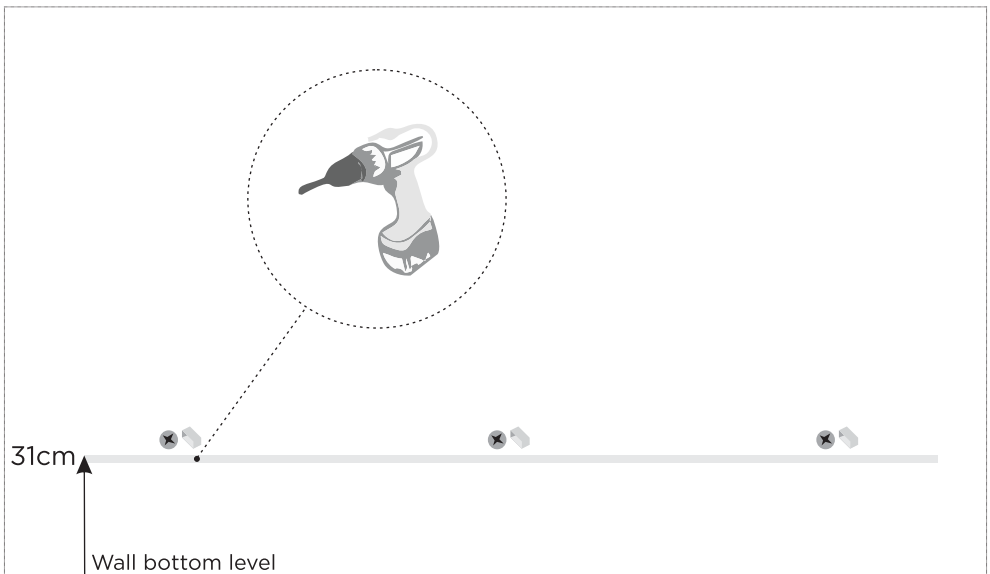

Step 1

Fix the wall mounting rail (clamp) starting from the bottom level of the wall with its mouth facing top.

Fixing the rail

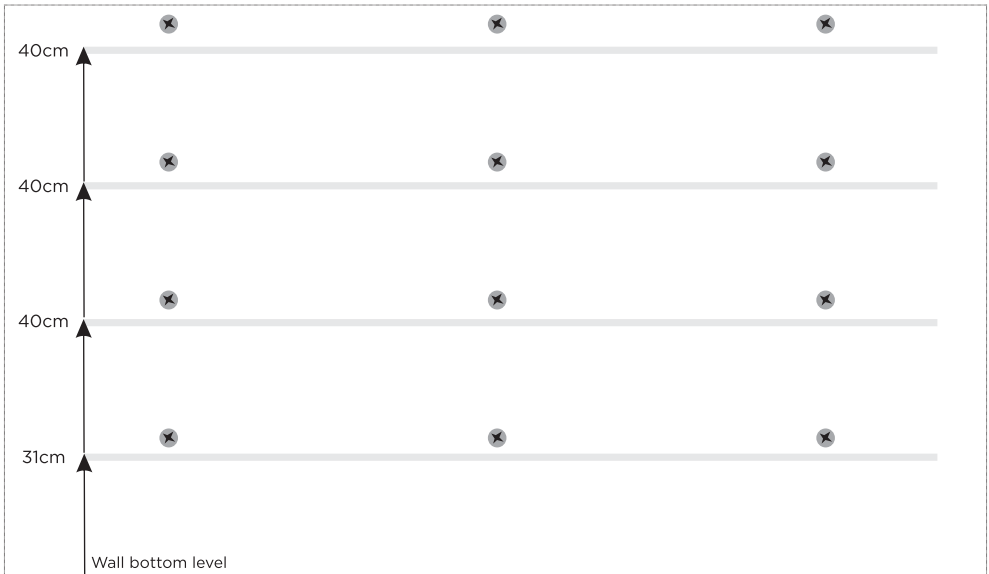

Step 2

While installing the initial row, maintain a gap of 31 cms from the bottom. Use a plastic bush to ensure a gap so that the back holder of the planter boxes seats correctly on the mouth of the rail.

Level rails and secure

Step 3

Once the rail is secured on the wall using screws, move on to the next level. Set a spacing of 40 cms from the top of each layer of the rail to the top of next layer. Hereafter every layer should be installed maintaining a distance of 40 cms from each other.

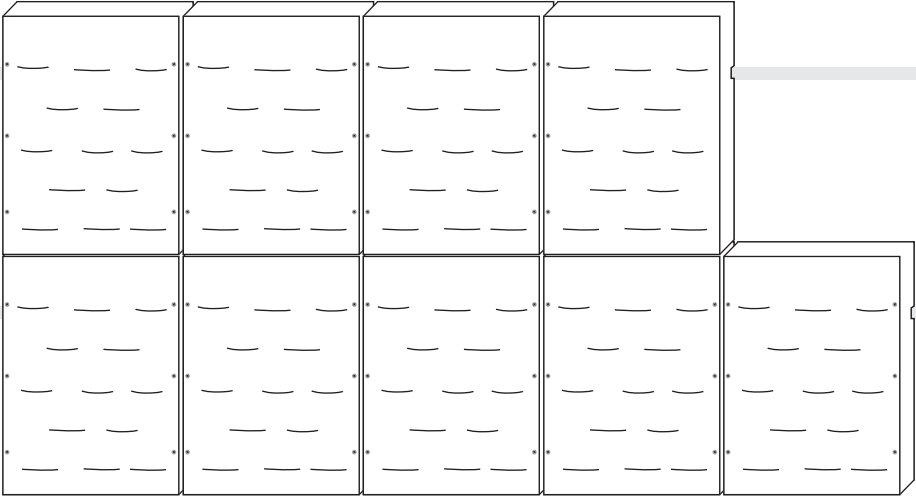

Planter box installation

Step 4

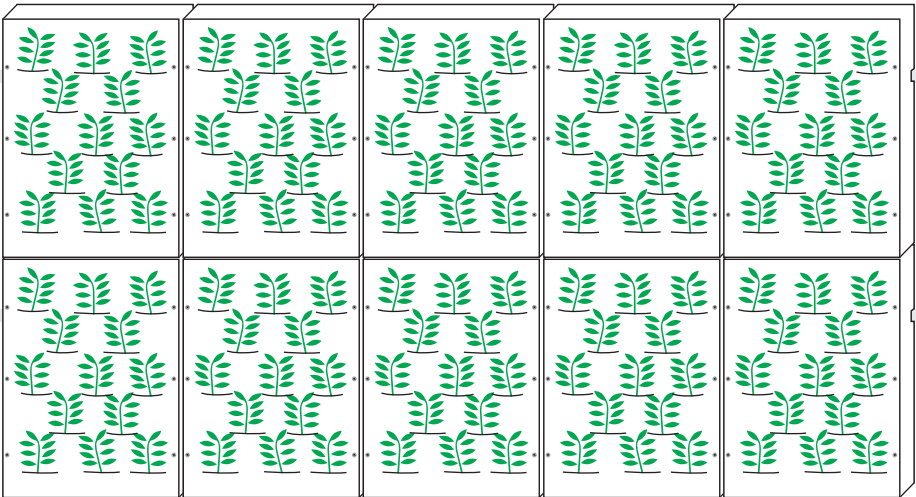

Once the desired layers of rails are affixed on the wall, the planter boxes can be installed one after the other on top and to the sides.

System Hardware Overview

System Software Overview

*The product has obtained certificate of registration of design (No.337167-001 dated 03/01/2021) from
Controller General of Patents, Design and Trademarks. GOVERNMENT OF INDIA PATENT OFFICE.*
